CEQ HOLDS ENVIRONMENTAL INDUSTRY CONFERENCE

Environmental expenditures are now providing the nation with over one million jobs, according to "Environmental Control Industry," a new study prepared for the CEQ-sponsored Environmental Industry Conference. Chairman Russell Peterson underscored the conclusions of the study in his remarks that "... (the study) provides a forceful rebuttal to the thesis that we must choose either a healthy economy or a healthy environment; on the contrary, it suggests, economic health and environmental health are interrelated." News Release

Pollution Control Programs Provide 1.1 Million Jobs in U.S., CEQ Says

The President's Council on Environmental Quality, in a new study, reports that industry, federal, state and local spending for the environment, together with expenditures for operating and maintenance, is currently providing the nation with over 1 million jobs.

And the study, which was prepared for the Council by two Wall Street analysts, concludes that "environmental control-related employment has been one of the relatively few areas of job strength during the recent recession.

"As pollution control programs are implemented and spending continues to rise accordingly, employment levels in this area could expand several fold over the next decade," the study states.

According to the report, 1975 expenditures for pollution control by all sectors of the economy total \$15.7 billions. Using data from the U.S. Bureau of Labor Statistics, the authors estimated that these expenditures are generating 1.1 million jobs for the economy as a whole.

The study notes that, by contrast, Environmental Protection Agency studies show 75 plant closings from January, 1971 to June, 1975, affecting 13,900 employees.

"But," the study declares, "the increase in unemployment caused by these potential closings will be less than is suggested. Lost production can be shifted to other plants, sometimes within the same firm."

The study points out that the affected plants are older, smaller and marginally profitable.

"It is the relative inefficiency of these plants ... that is the major factor in a decision to close rather than modernize," the report states. "In many instances, then, environmental regulations tend to accelerate already inevitable plant closings.

"Given the increase in environmental expenditures projected over the next decade, the number of jobs could increase several times over. Thus, it appears that governmental programs and expenditures supporting pollution control will have a beneficial impact on employment, a particularly noteworthy consequence in view of current unemployment levels," the study concluded.

The study places 1974 sales of air and water pollution equipment at \$1.7 billion and estimates that the environmental industry "could be called upon to provide equipment valued at \$33.9 billion (in 1974 dollars) between 1974 and 1983.

"Related pollution abatement activities could total another \$10.5 billion (also in 1974 dollars) during this period," the study declares.

The study also identified substantial foreign markets for U.S. manufactured pollution control equipment.

According to the Commerce Department, exports of pollution control equipment, which amounted to \$214 million in 1969, rose to \$331 million in 1973.

"The Commerce Department also projects that export volume in the future should increase at a faster pace than the 10 percent rate of yearly growth experienced since 1969," the authors noted.

"Proper allocation of equipment and services used in pollution control can contribute significantly to the efficient use of this nation's many and varied resources. Pollutants are generally the by-product of some process that may be expedient but inefficient or wasteful of our natural resources," the study states.

The study notes that pollution control equipment and procedures have resulted in increased profits for some users and concludes that "the real challenge for pollution control equipment manufacturers is to work with industry to improve process technologies in terms of both cost effectiveness and energy efficiency."

The study's authors -- Kenneth Leung of F. Eberstadt and Company and Jeffrey H. Klein of Kidder Peabody and Company, Inc., concluded that "when all factors are considered, including the impact on health and property, there does seem to be an outright economic advantage to pollution control."

"Today, plants that pollute are obsolescent and inefficient. Their failure to modernize will threaten the jobs of their employees,"CEQ Chairman Russell W. Peterson said in issuing the study.

"We are looking for jobs in America," Dr. Peterson continued. "Thus, it is important that we stimulate activities that create jobs. The clearly expressed desire of our fellow citizens for clean air, clean water, less noise and less waste provide such a stimulus. Enterprises that fill these needs can be among the most productive in our economy, protecting our health and our prosperity, saving valuable resources, and adding aesthetic qualities to our lives."

The 138-page study was prepared for the CEQ-sponsored Environmental Industry Conference which was held in Washington, December 9 and 10, under the supervision CEQ's Senior Economist, Dr. Edwin Clark, and is available from the Council's Public Information Office, 722 Jackson Place, N.W., Washington, D. C. 20006.

#

Remarks by Russell W. Peterson
Chairman, Council on Environmental Quality
Environmental Industry Conference
Mayflower Hotel, Washington, D. C.

OLD QUESTIONS, NEW ANSWERS:

Changing Concepts of Economic Growth
in an Environmental Age

I wish not only to welcome you to this Conference, but also to thank you for your presence here. I hope you will find the ensuing discussions helpful, and your investment of time and money in coming here to be productive. The Council on Environmental Quality has tried to design this Conference to meet those aims.

But let me confess frankly that there has been a certain Machiavellian strategy in asking you to meet here -- a kind of P.R. attempt to alter the image of the environmental movement. Judging from conversations I've had with various movers and shakers in this town, anyone associated with environmental action is perceived in a uniform, unvarying way.

Number one, the environmentalist has never met a payroll. On the contrary, he holds some frivolous job in a marginal enterprise -- canary-breeding, perhaps, or the painstaking fabrication of hand-woven jump-ropes. Inevitably he sports a beard, wears a purposely rumpled tweed jacket with leather patches at the elbows, and -- when the lights are turned down low -- he smokes pot. Most pernicious of all, he probably reads Karl Marx. Maybe even in the original kraut.

Number two, while healthy, robust, virile members of American society spend their weekends playing golf, tennis, or bridge, the environmentalist is darting over field and fen, binoculars at the ready, panting at the prospect of sighting a Yellow-Throated Warbler before any other member of his encounter-group does so.

Number three, he eats organic foods. While other families are gorging themselves on Steak Diane, the environmentalist's family squeaks by on lentil soup and patties of soybean flour shaped to resemble pork chops. The closest they've been to meat in the last three years was a visit to Smokey the Bear. The environmentalist proclaims that he will never kill any living thing, and that the mosquito has as much right to two weeks in Miami Beach as you or I.

Before I receive an angry phone call from the Audubon Society, I want to stress that this caricature does not resemble reality. Nonetheless, this is the picture that emerges from my contacts with many of those who are unsympathetic to the environmental movement. Hence, I thought it might be corrective to gather in Washington a group of people, associated with the environment, who defy all these stereotypes: people who wear \$200 suits; people who smoke cigars; people who can spot a Dow-Jones Average much faster than a Yellow-Throated Warbler; people who can discuss a sinking-fund debenture without blinking; people who have met a payroll; and people who, finally, are involved in the business of turning an unhealthy environment into a healthy profit.

The demand of our people for clean air and clean water is now established -- not as a fad, but as a permanent requirement of our way of life. And our free enterprise system is responding: our laboratories and factories are now producing the ideas, the processes, and the products necessary to satisfy that demand. In so doing, they are creating hundreds of thousands of jobs and numerous new investment opportunities. In fact, the fledgling environmental industry is one of the few growth sectors bucking the tide of the recession.

We are looking for jobs in America. Thus it is important that we stimulate activities that create jobs. The clearly expressed desire of our fellow citizens for clean air, clean water, less noise, and less waste provide such a stimulus. Enterprises that fill these needs can be among the most productive in our economy, protecting our health and our prosperity, saving valuable resources, and adding aesthetic qualities to our lives.

The free enterprise system thrives on competition in providing consumers with the products or services that they demand. We know that companies that produce a better product at a given price gain an edge over their competitors. We know that industries that modernize their processes will win out over those who stick with obsolescent, inefficient methods.

Today, plants that pollute are obsolescent and inefficient. Their failure to modernize will threaten the jobs of their employees. The rules of the game now require that any business that wishes to ply its trade in our country must do so without polluting the environment.

In spite of the fact, then, that this industry is another expression of free enterprise at work, we repeatedly encounter the argument that investments in environmental protection are non-productive; that they are pure cost; that they drain funds badly needed for productive investment in other parts of the economy.

In good times, such objections might be dismissed as routine complaints about the new, the unfamiliar. These days, however, they are given new force because of our shaky economic position. Despite some recent signs of improvement, unemployment remains high, at about 8.3 percent; inflation, which boosts the cost of all goods and services, is particularly acute in construction; and a shortage of investment capital has kept the cost of borrowing uncomfortably high. All these factors have intensified objections to environmental regulation in government as well as in industry; we've got to relax our standards a while, the critics say, and give our economy a chance to recover.

This argument has a surface persuasiveness; yet one can dig a little deeper in our economic data and argue quite the reverse. For, while many critics have been busily denouncing environmentalists as impractical do-gooders who care more about birds than about people, a new private, free-enterprise industry has grown up to satisfy the demand of the American people for a clean and healthy country to live in. And -- just as any other such industry does -- this one creates jobs, profit opportunities, and a market for investment.

It is the purpose of this Conference to explore the other, less widely recognized side of the argument between economics and the environment. In addition, we hope to give some visibility to an industry which -- while still comparatively new and small -- promises to become a permanent and profitable sector of American economic life.

In preparation for this Conference, CEQ commissioned a study of the industry by two financial analysts, Kenneth Leung and Jeffrey Klein. This study -- copies of which are available to you -- offers a profile of the pollution control industry, and analyzes the benefits as well as the costs associated with environmental investment. In my opinion, it provides a forceful rebuttal to the thesis that we must choose either a healthy economy or a healthy environment; on the contrary, it suggests, economic health and environmental health are interrelated.

Let me begin by looking at the cost side of environmental repair. CEQ estimates that U.S. expenditures for environmental improvement as a result of Federal legislation will amount to about \$200 billion over the 10-year period from 1974 through 1983. This includes both public and private expenditures, and covers environmental legislation related to air, water, noise, radiation, solid wastes, and stripmining. Approximately 25 percent of these expenditures will represent capital investments in plant and equipment; the rest will go for operating and maintenance.

It's worth emphasizing that equipment costs represent a relatively small part of pollution control investment. On a typical wastewater treatment plant, for example, equipment costs are only 10 to 22 percent of the total capital cost. Such plants are construction-intensive, with land, labor, brick, mortar, pipes, and other plant costs of sewage collection and treatment making up approximately 85 percent of expenditures. The total cost for constructing a 15-million gallon-a-day secondary sewage treatment plant is approximately \$15 million. Of this amount, \$2.3 million, or 16 percent, goes to purchase wastewater equipment. Almost three times that much goes for other equipment or facilities such as buildings, pipe, valves, heating, plumbing, ventilating, and site preparation. The labor costs for constructing the building and installing the equipment would be \$5.8 million.

The Federal Government plays the key role in the wastewater treatment business. First, it establishes the laws and regulations that require the program be carried out. In other words, it creates the market. Second, it provides 75 percent of the funds and determines when and where these funds will be released.

In 1970, the year we first celebrated Earth Day, the Federal Government disbursed \$176 million for municipal wastewater treatment facilities. This fiscal year (1976) \$2.2 billion or 12 times as much will be disbursed providing approximately 150,000 jobs. The rate of expenditure will probably double over the next few years.

At present, and for the next few years, the Nation is spending unusual amounts on environmental improvement to compensate for decades of neglect. Even so, estimated environmental expenditures amount to less than two percent of our GNP -- and even this figure will fall after we catch up with the backlog of pollution control investment and our GNP increases. Put another way, the per capita cost of pollution abatement in 1974 was between \$34 and \$40.

These are direct, quantifiable investments about which there is little dispute. After this, however, it becomes more and more difficult to obtain agreement about the costs and benefits of environmental improvement.

For example, it is often asserted that environmental programs cause unemployment. Because it was concerned about this possibility, the Environmental Protection Agency established an Early Warning System to monitor threatened and actual plant closings. Since 1971, EPA received indication of 75 plant closings affecting approximately 15,700 jobs, or sixteen thousandths of one percent of the labor force. Even in those plant closings, however, environmental regulations were only one consideration in closing down marginally productive, older plants that were on the brink of being phased out.

On the positive side, environmental spending creates jobs. Given the mix of expenditures made in 1970, the Bureau of Labor Statistics estimated that each billion dollars of Federal expenditures on pollution control generated 66,900 jobs. This year, Federal spending for pollution control will run about \$4.2 billion; private industry will spend about \$10 billion, for operation and maintenance as well as for capital equipment, and state and local governments will spend another \$1.5 billion -- for a grand total of \$15.7 billion. If each billion dollars' expenditure for pollution control generates an average of 70,000 jobs, then total employment related to 1975 spending would exceed 1 million.

Thus, the charge that environmental spending increases unemployment simply does not hold up. On the contrary, as CEQ's study comments, "environmental control-related employment has been one of the relatively few areas of job strength during the current recession."

The "energy crisis" has given the critics of environmental improvement another weapon -- or so they claim. Certainly decisions on environmental quality must take the energy crisis into account -- but the Klein Leung report indicates that our current use of energy for pollution control is quite modest. The direct energy required to operate SO₂ controls on all U.S. power plants, to operate tertiary municipal wastewater treatment plants for the entire U.S. population, and to collect and properly dispose of solid waste would add up to 747 trillion BTU's per year. That amounts to 1.04 percent of total U.S. energy demand at present -- and less than twice the amount of energy we used in 1963 to air-condition American homes. If all our power plants were using 3.5 percent sulfur-content fuels, they would need 62 trillion BTU's annually to meet environmental standards through the operation of lime-stone scrubbers -- about the same amount of energy we used in 1969 to run our electric frying pans. Providing tertiary wastewater treatment to the entire population would require 182 trillion BTU's of electrical energy -- about twice the amount we used in 1969 to operate electrical irons.

On the whole, then the energy penalty associated with pollution control appears relatively small. Easing pollution control requirements would not significantly reduce energy consumption -- whereas a cut-back in environmental cleanup would produce other problems that would require more energy and investment further up the line.

What I have said so far amounts to an argument that industry's costs for pollution control are well within the capacity of our economy to sustain, even in a sluggish period. This is, of course, an entirely negative perspective, one that completely neglects the positive benefits of pollution control in terms of improved health, safety, and general quality of life. Some of these benefits can be quantified in dollar terms, others cannot. Still others can only be guessed at, because the very nature of the beast is that you are trying to quantify something that did not happen. Health benefits are a prime example of this: how can you estimate the economic cost of sicknesses that never occurred, because they were prevented by environmental controls?

Occasionally, however, we can look back at sickness that occurred because environmental protection measures were not in effect. The English government estimates that in London, in 1952, a five-day period of extreme air pollution caused 4,000 deaths; during those five days, 1,100 patients were admitted to London hospitals daily -- 48 percent more than normal. Annual pollution damages to health and property resulting from that five-day episode were estimated at \$700 million -- and there is, of course, no method for quantifying the value of a human life in terms that make sense to anyone but an insurance company.

In our own country, the medical profession is pretty well agreed that a high percentage of cancer is caused by environmental factors -- as much as 70 to 80 percent. We know that many chemicals cause cancer in test animals, and that some cause it in human beings. We also know that we have been adding new chemicals to our environment at a rapid pace: literally thousands are discovered by the U.S. chemical industry annually, and hundreds are introduced commercially -- usually before we have any solid knowledge about their long-term health effects. Finally, by charting cancer incidence county-by-county, instead of by state, we see good correlations between frequency of the disease and areas of heavy industrial activity -- such as along the Mississippi, by the Delta.

Because cancer has such a long latency period -- on the order of 15 to 40 years -- we do not know how many people have already contracted the disease, but have yet to manifest the symptoms. We do know, however, that about \$1.8 billion is expended solely for the hospital care of cancer patients each year; additional costs -- for doctor bills, out-patient therapy, and other treatment-related fees -- raise the total expenditure well above ten billion dollars. In view of the long latency period for cancer, we can only hope that pollution abatement measures have been introduced in time to prevent this toll from multiplying over the next decades.

While it is difficult to evaluate the health benefits of environmental measures, it is clear that those measures are producing direct savings in the industrial sector -- by stimulating innovations that increase the productivity of materials and energy. A prime example of this is the paper industry. Roughly 60 percent of a tree is worthless for paper -- and in the past, paper companies have dumped their mill wastes or sold them very cheaply. But with the rise in chemical prices over the last several years; the increasing cost of pollution control measures; and a desire to squeeze as much profit as possible from existing facilities, paper companies have begun taking a harder look at their industrial garbage -- and they've found some money in there.

According to the Wall Street Journal, Union Camp used to sell its mill wastes for eight cents a pound: now it turns them into flavors and fragrances worth more than \$1 a pound, and has boosted its chemical sales to \$100 million a year. As a by-product of processing at its Bellingham, Washington, plant, Georgia Pacific is producing 190-proof alcohol -- so "pure and potent" that the Treasury Department has stationed men in the plant full time to make sure none of it is converted to drinking liquor before sale to industrial users. Westvaco has found the conversion of mill wastes into other products so profitable that it has created a chemical subsidiary with four processing plants and a research center staffed by 80 scientists; in the last five years, Westvaco's chemical sales have doubled, to \$45 million -- all from materials that the company used to dump.

Similarly, Dow Corning found that a \$2.7 million capital investment in equipment to recover chlorine and hydrogen previously lost to the atmosphere in making silicon reduced operating costs by \$900,000 a year -- a 33 percent annual return on investment. Hercules Powder spent \$750,000 to reduce solids discharged into the Mississippi -- and is now

saving \$250,000 a year in material and water costs. Process improvements in a Goldkist poultry plant have cut water use by 32 percent, reduced wastes by 66 percent, and produced a net annual saving of \$2.33 for every dollar expended. Philip Hanes, chairman of Hanes Dye and Finishing, has testified that "cleaning up our stacks and neutralizing our liquids was expensive, but in the balance we have actually made money on our pollution control efforts. EPA has helped our bottom line."

Such savings are bound to expand as recycling technology -- pioneered by your industry -- comes into its own. In last Sunday's New York Times, science writer Boyce Rensberger pointed out that every ton of steel produced from recycled municipal waste, instead of virgin ore:

- Saves enough electricity to power the average American home for eight months;
- Eliminates the production of 200 pounds of air pollutants normally produced in making steel from ore;
- Reduces consumption of fresh water by , 6,700 gallons
- Reduces discharges of pollutants into streams and sewers by 102 pounds; and
- Eliminates the 2.7 tons of mining wastes that are usually heaped around the landscape for every ton of steel ultimately produced.

"Ordinarily," Mr. Rensberger points out, "it can cost a city from \$1 or \$2 a ton to \$10 or \$12 a ton to dispose of wastes. A modern materials and energy recovery system, operated privately at a 15 percent profit margin, brings the cost down to \$3.45 a ton, making recycling economically attractive for most urban areas, which are paying more than that, or soon will be. Economists forecast that the rising costs of energy and of virgin material will gradually make solid waste so valuable that cities may some day be selling their garbage to private resource-recovery systems."

Unfortunately for our hard-pressed cities, that day has not yet arrived. But the success of an experimental recycling plant in St. Louis indicates that the notion of selling garbage is no improbable fantasy. Since 1972, when a 325-ton-a-day plant went into operation, the city has been recovering \$1 worth of ferrous material and \$2 to \$3 worth of energy from each ton of garbage. These figures so impressed Union Electric Company, contractor for the experimental plant, that Union is

now building a \$70 million, 8,000-ton recovery plant at its own expense. "We're going into this strictly as a private business," a company spokesman said, "because we think we can make money."

These and many other examples prove that environmental regulation -- unwelcome as it undoubtedly was -- has stimulated profitable innovations and new technology that would not otherwise have been developed. The catalytic converter, invented to reduce air pollution by automobiles, is a good example of the response of the free enterprise system to a need of the market. This device is already having a major impact in reducing auto pollution and, at the same time, increasing auto mileage per gallon of fuel. Full-page ads by General Motors attest to the major advances contributed by the catalytic converter. Changes in catalyst and in design promise to make the device appreciably more effective.

The cost of these abatement devices as installed and delivered to the auto purchaser totalled \$838 million last year, and will double this year, to \$1.7 billion. It is projected to grow to \$4 billion by 1979 (in 1974 dollars). Catalyst sales for this product will reach \$350 million in 1975, and \$900 million by 1979.

Because the U.S. has made the most extensive advances in developing pollution-control equipment, it also has a competitive advantage in supplying such equipment to other countries. I understand that catalytic converters are being exported in rapidly growing numbers, and the Department of Commerce is about to release a study which projects a multi-billion dollar export market for pollution control devices within a few years.

In view of the economic benefits that have already accrued from environmental improvement, it is difficult for me to understand the continuing resistance to such investment as "non-productive." However, economics is not my field -- as some members of my staff delight in reminding me. But an outside economist -- Dr. James Quinn, Professor of Management at Dartmouth College -- echoes my puzzlement. "Whenever a new need is recognized

and satisfied," he wrote in the MIT Technology Review last year, "a new market is created, and economic opportunities expand. This truism," he continued, "is accepted by economists and businessmen in all parts of the marketplace but one: environmental improvement. Instead environmentalists, economists, and national leaders reiterate, tirelessly and almost hypnotically, that the country must choose either economic growth or a better living environment."

Part of the reason for the resistance to environmental investment, undoubtedly, is that it is imposed by governmental regulation. I don't like governmental compulsion any more than anyone else -- but there is absolutely no alternative to such compulsion if we are to protect our environment. Clearly, we cannot make such protection voluntary; that would simply impose costs on conscientious, ethical companies, while giving a price advantage to unscrupulous competitors. And because air and water pollution don't halt at the city limits or the state line, the Federal government must take the most prominent and conspicuous role in setting standards.

Another cause of the resistance to environmental investment is probably the answer to the question, "Whose ox is being gored?" I have argued here that environmental investment can create jobs, stimulate productivity, and yield profits. In most cases, of course, those jobs and profits will accrue to the corporation selling or installing pollution-abatement devices -- not to the one buying them. I can understand the resentment of companies forced to make such investments in tough times; but that natural resentment should not be allowed to obscure the fact that their products and processes have in the past created costs which the public has had to bear. Economists have told us for years that "There is no free lunch." To this doctrine, environmental regulations have added a new one: There is no free pollution, either.

But the most important reason for resisting environmental clean-up expenditures, I think, is the normal human difficulty of recognizing -- and adjusting to -- rapid, major social change. The traditional rules by which the nation's business has been conducted are being drastically altered by our discovery that the earth has its own laws of supply and demand. We have in the past treated air and water as free goods -- goods that are infinite in amount, and inexhaustible in quality. And, in the past, this seemed true: the earth's own cleaning-up processes handled all the pollution man could produce, and recycled our air and water free of charge.

Today, however, man's rapidly expanding population, the incredible complexity of his technology, and the massive scale of his tools have caught up with the earth's resilience. Modern industrial life, coupled with the four billions of us who are competing for natural resources, now threaten man's life-support system. We must hope that the earth can support the eight billion human beings who will be here by the year 2010 -- but it certainly could not if past industrial trends had been allowed to continue.

Does this mean that economic growth must come to a halt?

No. To quote again from Dr. Quinn, what we need is a redefinition of traditional economic growth goals, not an abandonment of them. "Realistically," he writes, "such goals must reflect people's continuing desire to be 'better off' in each succeeding year. But being better off need not, and even now does not, include just the goods and services individuals purchase. It also embraces health, education, recreation, safety, security, and even aesthetics, purchased jointly or publicly. If economic growth is defined -- as ideally it should be -- to include the per capita increase in such values, policy makers will have many realistic options to provide continued improvements in life quality along with continued expansions in job, investment, and profit opportunities."

We are, in sum, facing the same old questions of economics that we have always tried to answer: how do we use limited resources to produce various commodities and distribute them in society? But environmental degradation forces us to give some new answers to these old questions. Our concept of economic growth must now be guided by a sense of the fragility of our earth and a recognition that the list of limited resources now includes our air, our water, and the natural resources we have spent so wastefully.

Though the quality of our environment concerns all of us, it is -- in a special sense -- the responsibility of your industry. The existence of your companies underlines the homely truth that laws cannot create clean air and clean water, recycle our wastes or dispose of them safely. Your progress in a relatively short time proves that free enterprise in partnership with government can safeguard our environment. The costs of your work, as far as I am concerned, are among the most productive investments the United States can make.

Animal and Plant Health Inspec. Service

Draft	Date
1976 Gypsy Moth Suppression & Regulatory Program	12/04

Proposed is the continuance of the Forest Service and Animal and Plant Health Inspection Service program, in cooperation with responsible state agencies, for the suppression and/or regulation of the gypsy moth, *Porthetria dispar*, through 1976. Carbaryl or trichlorfon will be used on about 100,000 acres.
(ELR ORDER # 51765)

Forest Service

Draft	Date
Long Island Unit Management Plan	12/01

Alaska

The statement concerns the land use plan for the Long Island Unit, Tongass National Forest. The plan provides recreation areas, intensification of timber management, soil and water resource management, promotion of wildlife values, and the maintenance of fish habitat. Adverse impacts include the changing of wildlife habitat, and the addition of roads to the area.
(ELR ORDER # 51731)

East R. & Upper Crystal R. Land Use Plan	12/19
--	-------

Colorado

County: Gunnison

Proposed is the updating of existing Multiple Use Management Direction on National Forest land in the East River Unit of the Gunnison National Forest and the Upper Crystal River Unit of the White River National Forest in Gunnison County, Colorado. Possible adverse effects include the reduction of property values of some private land, and the eventual loss of attributes exclusive to wilderness in Non-selected Roadless Areas GOI, GPI and GR.
(ELR ORDER # 51839)

Mt. Welba Unit Land Use Plan, Routt N.F.

12/19

Colorado

County: Moffat

Proposed is the implementation of a land use plan (multiple use plan) for the Mt. Welba Unit, Bears Ears Ranger District, Routt National Forest, Moffat County, Colorado. The Unit contains 13,440 acres of National Forest lands. Adverse effects include modification of scenic values, periodic and temporary changes in water and air quality and increased soil erosion.

(ELR ORDER # 51840)

Blacktail Land Use Plan, Routt N.F.

12/29

Colorado

County: Grand Routt

Proposed is the implementation of a revised Land Use Plan for the Blacktail Unit, Routt National Forest, Grand and Routt Counties. The Unit contains 23,475 acres of National Forest lands and includes Roadless Areas DL and DM. Adverse effects include modification of scenic values, periodic and temporary changes in water and air quality, and soil erosion due to the construction of roads and cutting of trees. Wilderness characteristics will be lost within Inventoried Roadless Areas DL and DM.

(ELR ORDER # 51862)

Snake River Basin Land Use Plan

12/29

Colorado

County: Summit

The statement consists of a proposal to update the existing Multiple Use Management Guide and intensify management actions for lands in the Snake River Basin, Arapaho National Forest, Summit County. The basin contains approximately 58,240 acres. Adverse effects include temporary disturbance of big game populations, reduction in the present level of air quality, and the reduction of land classified for timber production by 710 acres.

(ELR ORDER # 51863)

Mill Creek Planning Unit, Nezperce N.F.

12/02

Idaho

County: Idaho

The statement involves the implementation of a land use plan for the Mill Creek Planning Unit, Nezperce National Forest, Idaho. The 38,985 acre planning unit is divided into twenty management units for the purpose of resource allocation and direction. Activities involved in the plan

tend to modify natural conditions by altering present landscapes, disturbing wildlife, and altering wildlife habitat, reducing solitude, increasing soil movement, and affecting water quality and flow.
(ELR ORDER # 51751)

Bogus Basin Ski Area Expansion

12/22

Idaho

County: Boise

Proposed is the expansion of the Bogus Basin Ski Area on the Boise National Forest, Boise County, Idaho. The proposal calls for the addition of 1,370 acres upon which two double chairlifts, a warming lodge, and several ski runs will be developed. The major consideration involved is the allocation of the area to the long term commitment of a winter sports area.
(ELR ORDER # 51849)

Beartrap - Dutchler Planning Unit, Salmon N.F.

12/29

Idaho

County: Lemhi

Proposed is the implementation of a land use plan for the Beartrap - Dutchler Planning unit which contains approximately 169,000 acres in Lemhi County, Idaho. Adverse impacts include the alteration of wildlife habitat and the subsequent loss of species that are affected by habitat loss. Soil erosion also will occur in areas of timber harvest until revegetation and regeneration of timberstands is accomplished.
(ELR ORDER # 51868)

North Catahoula-South Winn Unit, Kisatchie N.F.

12/01

Louisiana

County: Grant Winn

The statement proposes a ten year management plan for the North Catahoula-South Winn Unit, Kisatchie National Forest, for approximately the period from 1976 to 1986. This unit contains 104,395 acres of National Forest land located in Grant and Winn Parishes, Louisiana. Major actions include harvesting of timber products, development of wildlife and range facilities, development of recreation facilities and reconstruction of roads. Adverse impacts will be caused by construction of roads and disturbances by off-road vehicles.
(ELR ORDER # 51738)

Ryan Park Winter Sports Site, Medicine Bow NP

12/23

Wyoming

County: Carbon

Proposed is the allocation of 280 acres of National

Forest land adjacent to Ryan Park, Wyoming for a winter sports site. The current allocation of 67 acres for a winter sports site at the nearby Ryan Park Ski Village would be terminated. Adverse effects include the loss of 10 acres of land from wood production, and an increase in the consumption of energy.
(ELR ORDER # 51858)

Final

Date

Basket Bay #2 Timber Sale, Tongass N.F.

12/17

Alaska

The statement deals with the proposal to salvage approximately 5.5 million board feet of blowdown timber from the 1968 Thanksgiving Day storm within the Kook Lake watershed on Chichagof Island. No roads would be constructed or reconstructed and the timber would be clearcut utilizing a helicopter yarding system. The project would remove 186 acres from an undeveloped category, and would result in noise that could have an impact on recreation use of Kook Lake cabins.

Timber Management Plan, Plumas N.F.

12/01

California

County: several

The statement proposes to carry out the revised Plumas National Forest Timber Management Plan which sets a total potential yield of 1,678.0 MMBF from the standard component commercial forest lands during the 10-year plan period. Adverse impacts include construction of roads for access to the harvest areas and degradation of appearance of the landscape.

(ELR ORDER # 51732)

Bigwood Ski Area, Sawtooth N.F.

12/01

Idaho

County: Blaine

On September 6, 1974, the Sawtooth National Forest filed with CEQ a draft EIS proposing development of a winter sports complex in the Butterfield Creek area within the Sawtooth National Recreation Area, which would have been named the Bigwood Ski Area. The decision has been made, however, to implement Alternative A in the draft EIS which is to halt action on development, terminate the existing special use permit, and restore to natural

conditions areas where vegetation has been removed and/or disturbed.

Date

Flint Creek Power Plant - 550 MW

12/23

Arkansas

County: Benton

The proposed project involves the request for guaranteed loan funds from REA for Arkansas Electric Cooperative Corporation's 50% participation in the construction of a new power plant in Benton County, Arkansas, to be known as the Flint Creek Power Plant. The proposed plant will have a gross generation capability of 550 MW and a net output of 530 MW. Approximately 650 acres of grazing land will be taken for construction purposes.
(ELR ORDER # 51860)

Soil Conservation Service

Draft

Date

Mud Creek Watershed

12/08

Alabama

County: Cullman

The proposed plan is for watershed protection and flood prevention in Cullman County, Alabama. The project entails the application of land treatment measures on 2,350 acres of cropland, 3,720 acres of pastureland, and 4.7 miles of channel work. Adverse impacts include increased sedimentation and stream turbidity, and the loss of 69 acres of flood plain forest. Temporary increases in air and noise pollution would also result.
(ELR ORDER # 51772)

Cadron Creek Watersheds

12/08

Arkansas

County: several

The proposed project consists of watershed protection, flood prevention, and recreation for North Fork Cadron Creek, East Fork Cadron Creek, and Lower Cadron Creek Watersheds. Adverse impacts include the inundation of 1,163 acres by sediment pools and 3,922 acres by detention pools, and the relocation of 15 people. Project activities will decrease woodland habitat by 989 acres. (ELR ORDER # 51769)

Upper Choptank River Watershed

12/23

Delaware

Maryland

Proposed is the implementation of a watershed protection, flood prevention, and drainage project located in Queen Anne and Caroline Counties, Maryland, and Kent County, Delaware. The project will consist of land treatment measures on 45,636 acres and 280 miles of multiple-purpose channel work. Adverse effects include the reduction of wildlife habitat values by 10% and recreational hunting resources from good quality to average quality.

(ELR ORDER # 51855)

Middle Walnut Watershed Project

12/12

Kansas

County: several

Proposed is a project for watershed protection, flood prevention, and public recreation in Butler, Cowley, Sedgwick, and Sumner Counties, Kansas. Adverse impacts of the project include the elimination of agricultural use and terrestrial wildlife habitat use of 518 acres, the interruption of agricultural and terrestrial wildlife habitat use of 1,225 acres by periodic flooding, the elimination of 167 acres of agricultural land for dams and spillways, and the relocation of 15 persons. (ELR ORDER # 51811)

Bayou Grosse Tete Watershed Project

12/01

Louisiana

County: Pointe Coupee

The proposed project is for watershed protection, flood prevention, and drainage in Pointe Coupee Parish, Louisiana. Approximately 115 miles of channel work with appurtenant structures that include one grade stabilization structure and structures for water control (pipe drops) will be installed. The clearing of 360 acres of forest land and existing channel rights-of-way reduce forest game habitat. (ELR ORDER # 51741)

Choctaw Bayou Watershed

12/08

Louisiana

County: Iberville Point Coupee West Baton Rouge

The proposed plan consists of land treatment and structural measures on 110,000 acres of land to provide flood protection and improve drainage in the Choctaw Bayou over a 50-year period. Adverse impacts include increase in soil erosion and a temporary lowering of water quality. A potential loss of 1,200 acres of forest land and habitat could occur as a result of the project.

(ELR ORDER # 51773)

Long Branch Watershed

12/04

Nevada

County: several

The proposed Long Branch Watershed Project consists of land treatment measures, 12 floodwater retarding structures, 12 grade stabilization structures, and one multiple purpose floodwater retarding recreation structure with recreation facilities. Adverse effects include loss of agricultural production on 377 acres, inundation of 26 miles of stream channel, loss of 97 acres of woodland and 219 acres of existing wildlife habitat, and the relocation of one farm family.

(ELR ORDER # 51763)

Crabtree Creek Watershed

12/08

North Carolina

County: Durham Wake

The proposed action involves the completion of a watershed project in Wake and Durham Counties, North Carolina for flood prevention. Adverse effects include the loss of 817 acres of wildlife habitat and the permanent inundation of 16 miles of perennial and intermittent channels. The clearing and permanent inundation of 1.3 acres in Schenck Memorial Forest Natural Area will also result, as well as the destruction of Cool Mill Site.

(ELR ORDER # 51776)

McKinney - Buzzard Creek Watershed Project

12/29

Oklahoma

County: McCurtain

The proposed watershed project is located in McCurtain County, Oklahoma. The planned action involves the installation of land treatment measures; one floodwater retarding structure; and 9.20 miles of multiple-purpose channel work with appurtenant structures. Adverse impacts include loss of wildlife habitat as a result of timber clearing, and localized increase in erosion and turbidity due to construction.

(ELR ORDER # 51871)

Meshaminy Creek Watershed

12/22

Pennsylvania

County: Bucks Montgomery

The proposed project is designed for watershed protection, flood prevention, water supply and recreation in Bucks and Montgomery Counties, Pennsylvania. Several project actions have been installed; those remaining include 5 floodwater retarding structures and a continuing program of land treatment. Adverse effects include the commitment of 425 acres and the periodic inundation of 813 acres. Three farms, 3 businesses, and 13 homes will be relocated.

(ELR ORDER # 51845)

Bush River Watershed Project

12/08

Virginia

County: Prince Edward

Proposed is a project for watershed protection, flood prevention, water supply, and fish and wildlife development in Prince Edward County, Virginia. The project will consist of land treatment on 19,810 acres of the watershed and eight dams. Project implementation will result in inundation of 26 miles of streams and the inundation or restricted use of 3,076 acres of land presently in forest land, cropland, and pastureland. Terrestrial wildlife habitat will also be reduced.

(ELR ORDER # 51771)

Goose Creek Watershed Project

12/22

Washington

County: Lincoln

The proposed action consists of a project for watershed protection, flood prevention, and recreation in Lincoln County, Washington. Project plans include conservation land treatment plus a multipurpose flood control and recreation structure, work on 750 feet of channel through the town of Wilbur, and flood control for the town of Creston. Land use will be altered on 465 acres, 10.5 acres of wetland will be eliminated, and displacement of 3 farmsteads and 7 persons will occur.

(ELR ORDER # 51844)

Final

Date

Prairie Creek (Vigo) Watershed

12/02

Indiana

County: Vigo

This project entails watershed protection, flood prevention and agricultural water management in Vigo County. Adverse

impacts are elimination of agricultural use of 20 acres of cropland, conversion of 17 acres of forest land habitat and 3 acres of idle land; temporary loss of 6 acres of forest land habitat and 2 acres of idle land; disturbance of 5.3 miles of stream fishery; disturbance of wildlife during periodic maintenance work; and temporary noise and air pollution during construction.

Lincoln Experimental Statellites 8 and 9 Program

12/30

Florida

The proposed action is the launch of the Lincoln Experimental Satellites 8 and 9 and solrad satellites 11A and 11B as a single payload by a Titan III-C from Launch Complex 40 at Cape Canaveral Air Force Station, Florida. The only adverse effects are a very small probability of small amounts of plutonium or beryllium being released and a very small probability of human fatality or injury from physical impact of accidentally reentering payload hardware. Either of these effects could only result from a malfunction of the launch vehicle.

Date

Redwood Shores Regional Shopping Center, Permit

12/03

California

County: San Mateo

Mobil Oil Estates Limited, Redwood City, California, has applied for a Department of the Army permit to fill and do storm drainage improvements on the approximately 210-acre area and to improve the existing dike along Steinberger Slough in preparation for the eventual construction of a regional shopping center. Adverse effects include: change in land use from open space to urban area, loss of levee-impounded marshland, changes in air and water quality, change in noise levels, and water runoff alteration.

(San Francisco District)

(ELR ORDER # 51758)

John Martin Dam and Reservoir, Arkansas River

12/09

Colorado

County: Bent

This statement concerns the identification of those impacts resulting from the continuing operation and maintenance program at John Martin Dam and Reservoir and the anticipated effects resulting from implementation of the updated John Martin Dam and Reservoir and the anticipated effects resulting from implementation of the updated John Martin Master Plan (November 1974). Adverse effects have been the development of sterile sediment beds, erosion of the shoreline and barren sediment beds, and some inundation of vegetation. (Albuquerque District)

(ELR ORDER # 51784)

Panama City Harbor and Grand Lagoon, Maintenance

12/09

Florida

County: Bay

Proposed is the continued maintenance to the authorized depths of the Federal navigation channels into Panama City Harbor and Grand Lagoon, Florida. Maintenance dredging will result in a temporary increase of turbidity, and the loss of non-motile organisms inhabiting the channel and disposal areas. There will also be an increase in potential sources of pollution associated with the growth of channel

traffic and industrial development. (Mobile District)
(ELR ORDER # 51785)

Waianae Light-Draft Harbor Construction

12/29

Hawaii

County: Oahu

The proposed project involves the construction of a 12-acre harbor to accomodate berthing of approximately 300 recreational sailing and fishing boats and the launching of trailered boats on the Waianae coast of the Island of Oahu, State of Hawaii. Adverse effects include disturbance of wildlife habitat and the alteration of approximately 1,200 linear feet of shoreline limestone cliff habitat. Water quality within the harbor will be degraded by boating activities and human use.

(ELR ORDER # 51870)

Indiana Shoreline Erosion, Lake Michigan

12/01

Indiana

The recommended plan of improvement provides for mitigation of shoreline erosion within the Indiana Dunes National Lakeshore located along the south end of Lake Michigan. The plan consists of placing 1.7 million cubic yards of sand along the shore in the downdrift area affected adversely by harbor structures. There will be some loss of yellow perch due to changed lake bottom conditions and short-term decrease in nearshore water quality. (Chicago District)

(ELR ORDER # 51727)

Great Lakes-St. Lawrence Seaway, Winter Program

12/09

Michigan

Proposed is the continuation of certain operational activities of a Winter Navigation Program, terminating 31 December 1976. The action would allow short-term authorization of activities carried out over the past 5 years of the program to meet current needs of shipping until the Final Feasibility Report is completed, five years hence. Structural damage to privately owned dock and recreational facilities and inconvenience to island residents are likely to occur.

(ELR ORDER # 51790)

Recreational Boat Harbor, DeTour

12/22

Michigan

County: Chippewa

Proposed is the establishment of recreational and refuge harbor facilities for small craft at DeTour, Chippewa County, Michigan. Dredging and construction

operations associated with the project would temporarily degrade the aquatic environment. Permanent adverse effects include the removal of some benthic organisms and degradation in water quality due to increased boat activity. (Detroit District)
(ELR ORDER # 51843)

Abiquiu Dam and Reservoir, O&M

12/10

New Mexico

County: Rio Arriba

Proposed is the continued operation and maintenance of Abiquiu Dam and Reservoir for flood damage reduction and sediment retention. The project also includes the development of recreation facilities and zoning of project lands. Approximately 1,500 acres of interspersed grassland and juniper woodland would be converted to a standing aquatic system, and archeological sites may be inundated.
(Albuquerque District)
(ELR ORDER # 51800)

Atlantic IC Waterway Side Channels, Maintenance

12/15

North Carolina

County: several

The action involves the maintenance of nine authorized side channels to the Atlantic Intracoastal Waterway from Morehead City to Southport, North Carolina. Adverse effects on aquatic organisms will result from turbidity and the removal of benthic organisms. Terrestrial organisms will be buried in the upland diked disposal areas and benthic organisms covered in overboard disposal.
(Wilmington District)
(ELR ORDER # 51819)

Shallotte & Lockwoods Folly Rivers, Maintenance

12/19

North Carolina

County: Brunswick

The action involves maintenance activities in existing navigation projects in Shallotte and Lockwoods Folly Rivers, North Carolina. Maintenance consists of the removal of shoals in the two navigable water systems. Shoal removal will adversely affect aquatic life and terrestrial organisms will be buried in the upland diked disposal areas. (Wilmington District)
(ELR ORDER # 51841)

B. Everett Jordan Dam and Lake (Supplement)

12/31

North Carolina

County: Chatham

This statement is the draft supplement to a final EIS filed with CEQ 22 October 1971. In reference to the

B. Everett Jordon Dam and Lake, Cape Fear River Basin, North Carolina, the supplement includes a reassessment of water quality and observation of the effects of present dam operation on vegetation, birds, mosquitoes and other vectors, fish, mammals, and sedimentation. Also discussed are records of heights and duration of all floods impounded behind the dam. (Wilmington District)
(ELR ORDER # 51874)

Chetco River Jetty Extension

12/01

Oregon

County: Curry

Proposed is the construction of a 1,250 foot extension of the south jetty and construction of a 750 foot extension of the north jetty, Chetco River, Oregon. The project would also include deepening of the existing 14 foot channel and turning basin to 16 feet. Adverse impacts include: disruption and removal of about 4 acres of river bottom; smothering of aquatic organisms and habitat during disposal; and coverage of 7.9 acres of offshore sandy bottom with rock. (Portland District)
(ELR ORDER # 51733)

Cooper River Dredging Permit, Amoco Chemicals

12/02

South Carolina

County: Berkeley

Proposed is extensive dredging by the Amoco Chemicals Corporation of the Cooper River and adjacent waters for the purpose of constructing a chemical plant and associated facilities. Adverse impacts include: conversion of undeveloped land to an industrialized state and the displacement of animal and plant communities; reduction of water quality and biological productivity; possibility of accidental spills which would adversely affect water quality and aquatic life; and disturbance to people living near railroad and roads in the project area. (Charleston District)
(ELR ORDER # 51749)

Town Bluff Dam and Sam Rayburn Dam

12/31

Texas

County: several

Proposed is an integrated operation and maintenance program at the Town Bluff Dam - B.A. Steinhagen Lake and the Sam Rayburn Dam and Reservoir. The program consists of flood control, generation of hydroelectric power, water conservation, fish and wildlife conservation and public recreational facilities development. Adverse effects include increased sanitation problems, altered water quality and chemistry caused by storage, and the displacement of some wildlife species.
(ELR ORDER # 51877)

Draft

Date

Offshore Terminal & Submarine Pipeline, Permit

12/17

Virgin Islands

Proposed is the issuance of a dredge and construction permit to Hess Oil Virgin Islands Corporation (HOVIC) for the purpose of construction of an offshore oil tanker unloading terminal and submarine pipeline approximately 2 miles south of the HOVIC refinery at Limetree Bay, St. Croix. Adverse effects include destruction of 4 1/2 acres of reef coral habitat and killing of some fish by blasting. Suffocation of adjacent corals, benthic algae, and sea-grasses would also occur due to suspended solids.

(Jacksonville District)

(ELR ORDER # 51827)

Fox R., Wisconsin Navigation Project - O&M

12/22

Wisconsin

County: several

Proposed is the continued operation and maintenance of the Fox River, Wisconsin Navigation Project. Project activities include operation and maintenance of locks and guard locks, channel dredging, and control of the operation of 13 dams. Temporary increase in turbidity and the destruction of benthic organisms in the areas dredged will result. Dredge material disposal may create undesirable effects due to leaching and runoff from the disposal sites.

(ELR ORDER # 51850)

Final

Date

Foster City Development, Permit

12/12

California

County: San Mateo

The Estero Municipal Improvement District, Foster City has applied for a Dept. of the Army Permit to place approximately 2,470,000 cu.yds. of fill on 5 areas totalling 382 acres in Foster City, San Mateo County. The 5 areas are proposed to be used for residential, city center, and light industrial development. The alteration of land use would eliminate wildlife habitat, and increase the chance of air quality degradation. (San Francisco District)

Water & Sewer Project, Brawley Co. Water District

12/08

California

County: Imperial

The proposed project consists of installation of water and sewer facilities to service the area encompassed by the Brawley Water County District, California. The district entails approximately 316 acres and would particularly affect the Central Imperial County area. Adverse effects include minor disruptions during construction, possible increased population, and air quality deterioration.

(ELR ORDER # 51778)

Low-Income Multi-Service Center, Livermore

12/09

California

County: Alameda

The proposed project is construction of an office building and development of relative off-street parking area in Livermore, California, to serve the Low-Income Multi-Service Center. Adverse effects will consist of increased levels of noise and air pollution.

(ELR ORDER # 51791)

Edenvale 11th Addition, Eden Prairie

12/08

Minnesota

County: Hennepin

Proposed is the provision by HUD of mortgage insurance for single family homes and multifamily housing projects, Edenvale Planned Unit Development, Eden Prairie. Adverse effects of development are removal of farm land from production and increased demand for facilities and services. Increase in noise pollution and auto traffic are also expected, as well as disturbance of the ecological system by construction.

(ELR ORDER # 51781)

Downtown-West Redevelopment Project, Norfolk

12/17

Virginia

County: several

The proposed project consists of eliminating blight and negative environmental factors on 67 acres of downtown waterfront property, the provision of as much as 3,300 units of housing and 120,000 square feet of compatible waterfront-related commercial activity, and the provision of public access and amenities along the Elizabeth River in Norfolk, Virginia. Adverse effects include impacts on air quality, noise, public services and the adjacent historic district.

The proposed project provides for improvements on St. Joe Road from Evard Road to Mayhew Road and from U.S. 30 to Stellhorn Road, Allen County, Indiana. The only commitment of resources accountable to this project will be the actual construction materials and the human effort necessary to complete the roadway.

(ELR ORDER # 51880)

Iowa 9, Waukon to Lansing

12/04

Iowa

County: Allamakee

Proposed is the upgrading of a segment of Iowa 9 in Allamakee County from 7th Street S.E. in Waukon, north-easterly approximately 17.4 miles to 2nd Street in Lansing. The proposed construction would consist of 24-foot wide pavement with 10-foot stabilized shoulders on an improved vertical and horizontal alignment. Adverse impacts include the loss of 65 to 90 acres of pastureland, the removal of wildlife habitat, and an increase in dust and noise levels. (ELR ORDER # 51760)

Freeway 518 and Iowa 92 Relocation

12/04

Iowa
County: Washington Johnson
Proposed is the development of a north-south freeway route generally paralleling the alignment of present U.S. 218 in southeastern Iowa. The proposed facility would extend northerly from just south of Iowa 92 in Washington County to the intersection of I-80 and I-380 in Johnson County. Also being considered is a 1.3 mile relocation of Iowa 92 in the vicinity of the proposed Freeway 518-Iowa 92 interchange. Adverse effects include the displacement of 10 to 316 individuals, and the loss of cropland, pasture, and woodland. (ELR ORDER # 51764)

I-70 Widening, Kansas City

12/10

Kansas
County: Wyandotte
Proposed is the widening of Interstate 70 from 94th Street to 10th Street in Kansas City. The improvement would consist of the addition of one lane in each direction between I-435 and I-635 and two lanes in each direction between I-635 and I-670. An additional 50 acres of land will be required for right-of-way, and from 2 to 52 families will be displaced. Construction disruption will result. (ELR ORDER # 51803)

US-36 Improvement, Kansas-Mo. State Line West

12/12

Kansas
County: Brown Doniphan
Proposed is the improvement of US-36, extending from the Kansas-Missouri State Line at St. Joseph, Missouri, to a point one mile east of the Brown-Doniphan County Line and one mile south of the existing US-36. Adverse effects include the removal of 1,600 acres of cropland from production, the acquisition of private residences with resultant displacement of people, and increases in noise and air pollution. (ELR ORDER # 51810)

M-21 Relocation, From M-24 to Near Wadhams

12/15

Michigan

County: Lapeer St. Clair

This project consists of approximately 40 miles of a limited access arterial freeway from M-24 in Lapeer County, easterly to existing M-21 near Wadhams in St. Clair County, Michigan. The new facility would cause the removal of agricultural lands from production, the displacement of residences and other structures, and the alteration of local highway access routes by closure of several county roads.
(ELR ORDER # 51818)

Route 60, Carter County

12/23

Missouri

County: Carter

Proposed is the acquisition of limited access right-of-way for an ultimate 4 lane expressway around the southern limits of Van Buren, Missouri. The project provides for improvement of a curvilinear section of Route 60 and the replacement of the bridge over the Current River. Adverse effects include the removal of 35 houses and relocation of 90 people.
(ELR ORDER # 51854)

West Cornhusker Highway, Lincoln

12/08

Nebraska

County: Lancaster

The proposed roadway improvement involves the upgrading and reconstruction of a 1.3 mile segment of West Cornhusker Highway and North West First Street in Lincoln, Nebraska. Construction will require an additional 12 acres of right-of-way and will require the relocation of twelve families and two businesses. A 4(f) statement is included concerning Oak Lake Park.
(ELR ORDER # 51770)

SR 63, Ashland

12/10

Nebraska

County: Saunders

The statement concerns the reconstruction of State Highway 63 to provide a more direct, flood free, all-weather route in Ashland, Nebraska. The segment will be from 0.86 to 3.6 miles long and require six to 52 acres of right-of-way, depending upon alternative chosen. Adverse impacts include dislocation of families and businesses, water pollution during construction, and vegetation loss.
(ELR ORDER # 51802)

US 90, I-10 to SF 146

12/29

Texas

County: Harris Liberty

The proposed action is construction of a controlled access freeway in northeast Harris County and consists of the relocation and improvement of US Highway 90, with a total length of approximately 21.5 miles. Adverse impacts include the taking of forest and grass lands for right-of-way purposes resulting in a loss of flora and fauna. Project implementation would require the displacement of 52 families and 13 businesses.
(ELR ORDER # 51866)

SR-90, Junction SR-5 to Vicinity Junction SR-405

12/18

Washington

County: King

Proposed is the construction of a 10-lane Interstate Freeway, (SR-90), extending from Junction SR-5 to Vicinity Junction SR-405. Project length is 6.79 miles. Adverse effects include displacement of residences and businesses, the elimination of native vegetation, and the destruction of a small amount of wildlife. A 4(f) statement is included in reference to Sturgas Park, Judkins Playground and Luther Burbank Park.

12/29

The proposed action provides for the establishment of a new LORAN-C radio-navigation chain along the US West Coast and in the Gulf of Alaska. Stations will be located in Nevada, California, Washington, Alaska, and Southwestern Canada. There will be minimal adverse impact on local water supplies, sanitation systems, and electric utilities. There will be some visual impact at all stations due to the height of the towers.

Vessel Traffic System, Houston-Galveston Area

12/15

Texas

The statement refers to the establishment of a Vessel Traffic System for the Houston-Galveston area consisting of a combination of VHF-FM Communications, radar surveillance, and a Vessel Movement System in part, or total. There will be a slight noise increase during construction.

Draft

Date

VA Hospital, Columbia (Supplement)

12/02

South Carolina

This supplement is intended to be the the final EIS
for a 400-bed Replacement Hospital and modernization of
existing VA Hospital by constructing a new 400-bed hospital
tower building with a two-story auxillary base for clinics
and support services and by alterations to existing build-
ings. Included in the project is a future Nursing Home
Care Unit.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

OFFICE OF THE
ADMINISTRATOR

AVAILABILITY OF ENVIRONMENTAL PROTECTION
AGENCY COMMENTS ON ENVIRONMENTAL
IMPACT STATEMENTS AND OTHER
ACTIONS IMPACTING THE ENVIRONMENT

Pursuant to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969, and section 309 of the Clean Air Act, as amended, the Environmental Protection Agency (EPA) has reviewed and commented in writing on Federal agency actions impacting the environment contained in the following appendices during the period of December 1, 1975 and December 31, 1975.

Appendix I contains a listing of draft environmental impact statements reviewed and commented upon in writing during this review period. The list includes the Federal agency responsible for the statement, the number and title of the statement, the classification of the nature of EPA's comments as defined in Appendix II, and the EPA source for copies of the comments as set forth in Appendix VI.

Appendix II contains the definitions of the classifications of EPA's comments on the draft environmental impact statements

as set forth in Appendix I.

Appendix III contains a listing of final environmental impact statements reviewed and commented upon in writing during this review period. The listing includes the Federal agency responsible for the statement, the number and title of the statement, a summary of the nature of EPA's comments, and the EPA source for copies of the comments as set forth in Appendix VI.

Appendix IV contains a listing of final environmental impact statements reviewed but not commented upon by EPA during this review period. The listing includes the Federal agency responsible for the statement, the number and title of the statement, and the source of the EPA review as set forth in Appendix VI.

Appendix V contains a listing of proposed Federal agency regulations, legislation proposed by Federal agencies, and any other proposed actions reviewed and commented upon in writing pursuant to section 309(a) of the Clean Air Act, as amended, during the referenced reviewing period. The listing includes the Federal agency responsible for the proposed action, the title of the action, a summary of the nature of EPA's comments,

and the source for copies of the comments as set forth in Appendix VI.

Appendix VI contains a listing of the names and addresses of the sources of EPA reviews and comments listed in Appendices I, III, IV, and V.

Copies of the EPA Manual setting forth the policies and procedures for EPA's review of agency actions may be obtained by writing the Public Information Reference Unit, Environmental Protection Agency, Room 2922, Waterside Mall SW, Washington, DC 20460, telephone 202/755-2808. Copies of the draft and final environmental impact statements referenced herein are available from the originating Federal department or agency.

A handwritten signature in dark ink, reading "Rebecca W. Hanmer". The signature is written in a cursive style with a horizontal line at the end.

Rebecca W. Hanmer
Acting Director
Office of Federal Activities

Dated: 1/21/76

APPENDIX II

DEFINITIONS OF CODES FOR THE GENERAL NATURE
OF EPA COMMENTS

ENVIRONMENTAL IMPACT OF THE ACTION

LO--Lack of Objection

EPA has no objections to the proposed action as described in the draft impact statement; or suggests only minor changes in the proposed action.

ER--Environmental Reservations

EPA has reservations concerning the environmental effects of certain aspects of the proposed action. EPA believes that further study of suggested alternatives or modifications is required and has asked the originating Federal agency to reassess these impacts.

EU--Environmentally Unsatisfactory

EPA believes that the proposed action is unsatisfactory because of its potentially harmful effect on the environment. Furthermore, the Agency believes that the potential safeguards which might be utilized may not adequately protect the environment from hazards arising from this action. The Agency recommends that alternatives to the action be analyzed further (including the possibility of no action at all).

ADEQUACY OF THE IMPACT STATEMENT

Category 1--Adequate

The draft impact statement adequately sets forth the environmental impact of the proposed project or action as well as alternatives reasonably available to the project or action.

Category 2--Insufficient Information

EPA believes that the draft impact statement does not contain sufficient information to assess fully the environmental impact of the proposed project or

action. However, from the information submitted, the Agency is able to make a preliminary determination of the impact on the environment. EPA has requested that the originator provide the information that was not included in the draft statement.

Category 3--Inadequate

EPA believes that the draft impact statement does not adequately assess the environmental impact of the proposed project or action, or that the statement inadequately analyzes reasonable available alternatives. The Agency has requested more information and analysis concerning the potential environmental hazards and has asked that substantial revision be made to the impact statement.

APPENDIX III

FINAL ENVIRONMENTAL IMPACT STATEMENTS FOR WHICH COMMENTS WERE ISSUED BETWEEN DECEMBER 1, 1975 AND DECEMBER 31, 1975

IDENTIFYING NUMBER	TITLE	GENERAL NATURE OF COMMENTS	SOURCE FOR COPIES OF COMMENTS
<u>DEPARTMENT OF AGRICULTURE</u>			
F-SCS-A36388-00:	EMERGENCY WATERSHED PROTECTION, AUTHORIZED BY SECTION 216 OF THE FLOOD CONTROL ACT OF 1950, PL 81-516	EPA GENERALLY HAD NO OBJECTIONS TO THE PROGRAM AS PROPOSED. HOWEVER, EPA RAISED SEVERAL CONCERNS WITH THE PROGRAM, INCLUDING THE TIMING OF EMERGENCY ACTIONS A LACK OF DEFINITION OF THE INTERACTION OF THE PROGRAM WITH OTHER EMERGENCY PROGRAMS, AND THE INCLUSION OF ACTIONS SEEMINGLY OUT OF AN EMERGENCY NATURE IN THE PROGRAM. EPA SUGGESTED THAT THEIR CONCERNS BE ADDRESSED IN PROGRAM IMPLEMENTATION.	A
F-SCS-F36025-IN:	PRAIRIE CREEK WATERSHED, VIGO COUNTY, INDIANA	EPA GENERALLY HAD NO OBJECTIONS TO THE PROPOSED PROJECT. HOWEVER, EPA RECOMMENDED THAT THE SCS INITIATE A STUDY OF THE BIOLOGICAL EFFECTS OF ONE-SIDE CHANNELIZATION MEASURES UPON THE STREAM ECOSYSTEM.	F
<u>CORPS OF ENGINEERS</u>			
F-COE-A35022-OH:	PILOT SEDIMENT REMOVAL PROGRAM, CUYAHOGA RIVER, OHIO	EPA GENERALLY HAD NO OBJECTIONS TO THE PROJECT AS PROPOSED.	F
FS-COE-A35106-SC:	COLLETON RIVER AT VICTORIA BLUFF, BEAUFORT COUNTY, SOUTH CAROLINA	THE CONTEMPLATED DELETION OF A LARGE PORTION OF BUFFER E AREA AS RAISED IN THE SUPPLEMENTAL EIS NOW INTRODUCES THE POSSIBILITY THAT A MORE ENVIRONMENTALLY DAMAGING TYPE OF INDUSTRY MAY DEVELOP IN THE 308 ACRES REMOVED FROM THE BUFFER AREA. WITH NO REAL ASSURANCE AS TO THE FUTURE USE OF THIS ADDITIONAL ACREAGE, EPA QUESTIONS	E

THE NEED FOR REDUCTION OF THE BUFFER ZONE. IF MORE INFORMATION FROM CHICAGO BRIDGE AND IRON IS NOT FORTHCOMING EPA WOULD HAVE RESERVATIONS CONCERNING THE OPEN-ENDED NATURE OF THE REVISED PERMIT APPLICATION.

FS-COE-A36420-00:

TOMBIGBEE RIVER AND TRIBUTARIES,
LUXAPALILA CREEK SEGMENT, ALABAMA
AND MISSISSIPPI

EPA BELIEVES THAT ITS COMMENTS EXPRESSING ENVIRONMENTAL RESERVATIONS ON THE FINAL EIS DATED JULY 22, 1975 ARE STILL APPLICABLE TO THE PROPOSED PROJECT. SPECIFICALLY, EPA BELIEVES THAT THE CHANNELLIZATION OF THE 22 STREAMS TRIBUTARY TO THE TENNESSEE-TOMBIGBEE WATERWAY PROJECT IS UNNECESSARY AND, IN MOST RESPECTS, IS DETRIMENTAL TO THE OVERALL WATER QUALITY OF THE PROJECT. IT IS NOTED THAT THE CORPS IS RECOMMENDING THAT THE CHANNELIZATION OF THE SIPSEY AND NOXUBEE RIVERS BE DROPPED, BUT FROM A WATER QUALITY STANDPOINT, THE ELIMINATION OF THE CHANNELIZATION IN THE RECEIVING STREAMS WOULD ALSO BE BENEFICIAL.

F-COE-A36440-OH

BIG CREEK AND METRO ZOO AND
AESTHETIC IMPROVEMENTS, CLEVELAND,
OHIO

EPA GENERALLY HAD NO OBJECTIONS TO THE PROJECT AS PROPOSED.

F-COE-D28001-VA:

LITTLE CREEK WATER SUPPLY RESERVOIR,
JAMES CITY COUNTY, VIRGINIA

EPA GENERALLY HAD NO OBJECTIONS TO THE PROJECT AS PROPOSED. A SURVEY IS BEING CARRIED OUT TO DETERMINE THE CHLOROFORM CONTENT OF THE FINISHED DRINKING WATER FROM THIS TREATMENT PLANT (NEWPORT NEWS). IN THE EVENT THE CHLOROFORM CONTENT IS HIGH, TECHNOLOGY HAS BEEN DEVELOPED AND SHOULD BE APPLIED TO REMOVE HUMIC ACIDS AT THE TREATMENT FACILITY PREVENTING THE PRODUCTION OF CHLOROFORM.

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

R-ERD-A09038-00: 10 CFR PART 790, GEOTHERMAL ENERGY,
RESEARCH DEVELOPMENT, DEMONSTRATION
AND PRODUCTION; FEDERAL GUARANTEES
ON LOANS

EPA GENERALLY HAD NO OBJECTIONS TO THE PROPOSED
REGULATION. HOWEVER, EPA RECOMMENDED THAT THE
REGULATION BE REVISED TO REQUIRE THAT IN THE ABSENCE
OF APPLICABLE ENVIRONMENTAL STANDARDS, THE ERDA
PROJECT MANAGER SHOULD CONSULT WITH THE APPROPRIATE
FEDERAL, STATE, AND LOCAL REGULATORY BODIES PRIOR
TO THE INDEPENDENT ESTABLISHMENT OF A STANDARD. EPA
ALSO RECOMMENDED THAT "RADIATION POLLUTION" BE ADDED
TO THE POLLUTION CONTROL STANDARDS WHICH MUST BE MET
BY BORROWERS OF ERDA FUNDS.

A

FEDERAL ENERGY ADMINISTRATION

R-FEA-A04031-00: 10 CFR PART 214, MANDATORY ALLOCATION
OF CANADIAN OIL

EPA GENERALLY HAD NO OBJECTIONS TO THE PROPOSED
REGULATION. HOWEVER, EPA EXPRESSED CONCERN OVER THE
POTENTIAL FOR NEW OR AGGRAVATED IMPACTS ON THE
ENVIRONMENT FROM ACTIONS TAKEN AS A RESULT OF
REGULATIONS AND RECOMMENDED THAT FEA MAY WISH TO MAKE
A DETAILED ANALYSIS OF THE EXPECTED ALTERNATIVE CRUDE
OIL SUPPLY PLANS OF AFFECTED REFINERIES; ESPECIALLY
AS THEY MAY INVOLVE SIGNIFICANT CONSTRUCTION ACTIVITIES
AND ASSOCIATED ENVIRONMENTAL IMPACTS.

A

DEPARTMENT OF THE INTERIOR

R-BIM-A25034-00: 43 CFR PART 2912, RECREATION AND

EPA GENERALLY HAD NO OBJECTIONS TO THE PROPOSED

A

GENERAL NATURE OF COMMENTS

PUBLIC PURPOSES ACT, PROCESSING AND
DISPOSAL OF SOLID WASTE

EPA'S COMMENTS REQUESTED THAT THE FINAL REGULATION RESOLVE SEVERAL ISSUES WITH RESPECT TO THE SCOPE OF THEIR APPLICABILITY, INCLUDING APPLICABILITY TO LEASES WHICH MAY NOT HAVE BEEN ISSUED SPECIFICALLY FOR THE PURPOSES OF SOLID WASTE DISPOSAL, AND SUGGESTED THAT THE FINAL RULEMAKING REQUIRE COMPLIANCE WITH ALL APPLICABLE POLLUTION CONTROL REGULATIONS AS WELL AS REQUIRE REMEDIAL ACTION TO BE TAKEN BY THE LESSEE UPON LEASE CANCELLATION FOR NONCOMPLIANCE.

A-IGS-A02084-00:

NOTICES, DRILLING PROCEDURES, REVISION
OF PROPOSED OCS ORDER NO. 2, PACIFIC
AREA

EPA GENERALLY HAD NO OBJECTIONS TO THE PROPOSED OCS ORDER. HOWEVER, EPA POINTED OUT THAT THE RELEASE OF HYDROGEN SULFIDE GAS AND SULFUR DIOXIDE THAT MAY RESULT FROM FLARING MAY IMPACT ON THE AIR QUALITY OF NEARBY LAND AREAS AND THAT STATE ODOR NUISANCE REGULATIONS COULD BE VIOLATED UNDER CERTAIN METEOROLOGICAL CONDITIONS. IN ADDITION, EPA POINTED OUT THAT DISCHARGE OF MATERIALS FROM OIL DEVELOPMENT REQUIRES A NPDES PERMIT.

R-MES-A01030-00:

30 CFR PARTS 55, 56, AND 57, NEW AND
REVISED HEALTH AND SAFETY STANDARDS

EPA GENERALLY HAD NO OBJECTIONS TO THE PROPOSED REGULATIONS. EPA DID, HOWEVER, NOTE APPARENT OMISSIONS IN REGULATING THE DISPOSAL OF RESIDUAL FLUIDS AND IN VARIOUS AIR QUALITY AND RADIATION MONITORING PROCEDURES. EPA ALSO RECOMMENDED THAT THE REGULATIONS REQUIRE COMPLIANCE WITH APPLICABLE NOISE ABATEMENT REGULATIONS.

- 102 -

DEPARTMENT OF TRANSPORTATION

PS-OGD-A52073-00:

33 CFR PART 157, TANK VESSELS CARRYING
OIL IN DOMESTIC TRADE, PROTECTION OF
MARINE ENVIRONMENT

EPA EXPRESSED SUBSTANTIAL CONCERN ABOUT (1) THE FORMULA APPROACH FOR DESIGN OF NEW VESSELS, (2) THE ADEQUACY OF THE DATA BASE AND THE ANALYSES UPON WHICH TO BASE NEW VESSEL REQUIREMENTS, AND (3) THE NEED TO ADDRESS THE ISSUE OF RETROFITTING EXISTING VESSELS. EPA PRESENTED AN ALTERNATIVE APPROACH FOR REDUCING HYPOTHETICAL ACCIDENT OIL OUTFLOW AND RECOMMENDED THAT MINIMUM SIDE PROTECTION FOR ALL DESIGNS BE INCREASED TO TWO METERS AND A CONCERTED INTERAGENCY EFFORT BE

IDENTIFYING
NUMBER

TITLE

GENERAL NATURE OF COMMENTS

INITIATED IMMEDIATELY TO DEVELOP A MORE SUBSTANTIAL INFORMATION BASE FOR EXISTING VESSEL DESIGN OPTIONS WHICH WILL LEAD TO REASSESSMENT OF THE REGULATION BY JANUARY 1, 1978.

R-DOT-A03054-00:

49 CFR PART 195, TRANSPORTATION OF LIQUIDS BY PIPELINE, OFFSHORE PIPELINE FACILITIES

EPA GENERALLY HAD NO OBJECTIONS TO THE PROPOSED REGULATION. HOWEVER, EPA IDENTIFIED A NUMBER OF SECTIONS WHICH NEED TO BE REWRITTEN SO AS TO BE MORE PROTECTIVE OF THE OFFSHORE ENVIRONMENT. FOR INSTANCE, IT WAS SUGGESTED THAT THE SECTION ON EXTERNAL PRESSURES BE EXPANDED TO GIVE GUIDANCE ON HOW TO DEAL WITH EXTERNAL PRESSURES IN PIPELINE DESIGN AND THE SECTION WHICH WOULD ALLOW THE REPAIR, RATHER THAN THE REMOVAL AND REPLACEMENT, OF CRACKED WELDS ON PIPE BEING LAID FROM LAY BARGES WAS STRONGLY OPPOSED.

A

R-DOT-A03056-00:

49 CFR, PART 195, TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE, OFFSHORE PIPELINE

EPA GENERALLY HAD NO OBJECTIONS TO THE PROPOSED REGULATIONS. HOWEVER, EPA OFFERED SEVERAL RECOMMENDATIONS ON HOW THE PROPOSED REGULATIONS COULD BE CHANGED IN ORDER TO BE MORE PROTECTIVE OF RURAL AND OFFSHORE ENVIRONMENTS. ALSO, EPA STRONGLY OPPOSED THE PROPOSED PRACTICE WHICH WOULD ALLOW CRACKED WELDS ON PIPE BEING LAID BY BARGE TO BE REPAIRED, INSTEAD OF REMOVED AND REPLACED.

A

A-FAA-A51906-00:

AIRPORT NOISE POLICY, PROGRAM TO PROVIDE EFFECTIVE RELIEF FROM AIRCRAFT NOISE

EPA BELIEVES THAT A COMPREHENSIVE, NATIONAL AVIATION NOISE ABATEMENT AND CONTROL PROGRAM REQUIRES A VIGOROUSLY PURSUED RESEARCH AND DEVELOPMENT PROGRAM TO DEVELOP ADDITIONAL TECHNIQUES TO REDUCE SOME NOISE LEVELS AND THE CONTINUAL DEVELOPMENT AND APPLICATION OF NOISE ABATEMENT OPERATING PROCEDURES. IN ADDITION, EPA BELIEVES THAT APPROPRIATE SITE CONTROLS SHOULD BE APPLIED INCLUDING THE IMPLEMENTATION OF AIRPORT OPERATIONAL CONSTRAINTS AND THE DEVELOPMENT OF COMPATIBLE LAND USE AROUND AIRPORTS.

EXECUTIVE OFFICE OF THE PRESIDENT
COUNCIL ON ENVIRONMENTAL QUALITY
722 JACKSON PLACE, N. W.
WASHINGTON, D. C. 20006

102 Monitor

The 102 Monitor is the monthly publication of the Council on Environmental Quality. In addition to its listing of environmental impact statements which have been filed with the Council under the provisions of the National Environmental Policy Act (NEPA), the Monitor contains a list of EPA's comments, filed under the provisions of section 309 of the Clean Air Act, as amended; items of current concern in NEPA case law; and information on the environmental studies of the Council.

The 102 Monitor is printed and distributed by the Government Printing Office. The subscription rate for the Monitor is \$21.50 annually, with an additional \$5.40 charge for foreign mailing; individual copies of the Monitor are \$1.80 from GPO.
